

Deploy a website in github using ansible playbook

```
---
- hosts: all
  become: true
  tasks:
    - name: Install apache
      ansible.builtin.package:
        name: apache2
        state: present
    - name: Install git
      ansible.builtin.package:
        name: git
        state: present
    - name: Remove file (delete file)
      ansible.builtin.file:
        path: /var/www/html/index.html
        state: absent
    - name: Git checkout
      ansible.builtin.git:
        repo: 'https://github.com/akshu20791/apachewebsite'
        dest: /var/www/html
```
